

Hughenden Primary School

Working together, Empowering Lives, Enriching Minds

5th February 2019

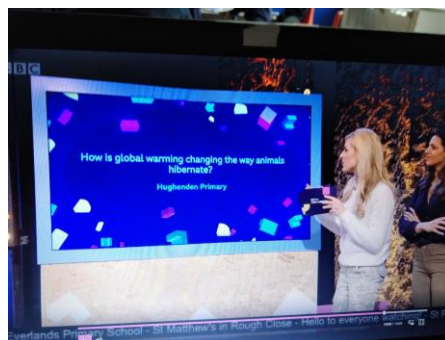

Dear Parents and Guardians,

Today in Hughenden Primary school, we took part in a BBC Live science lesson all about winter animals and their habitats, as part of our learning on living things and their habitats.

Hundreds of school from all around the United Kingdom also took part in this lesson about our country's wildlife. The presenters included famous naturalist and TV presenter, Chris Packham, who asked for children to send in questions about wildlife and their habits.

Out of the hundreds of questions submitted, only a couple were answered, one which was from a pupil in Year 5 at Hughenden Primary.

If you like to watch this video and share this incredible lesson with your child, please click on this link to the BBC teach live lessons. If you would like to see our question, just move the duration bar along until 5 minutes before the end of the programme. <https://www.bbc.com/teach/live-lessons/winterwatch-live-lesson/z4rvjhv/>

Over the last couple of weeks, we have taken part in lots of projects to do with nature, including the RSPB Big Birdwatch to see what breeds of birds live in our area. We have lots of other nature projects coming up, including visits from the Nite Owls team, who will bring along and talk to us about owls in our country.

If you have any links to science professionals or conservationists, we would love to hear from you.

Kind regards,
Emily, Year 5
